

Litelab Service

Complete service and repair for the original Litelab controllers for starburst, Glowtex and other disco lighting displays.

Do you have a Litelab controller from the 70s - 80s that no longer works? We can restore it to its original working condition and make your classic light show work like it was new. We don't just fix what is broken, we restore your controller to a like new condition. We even give you a one year limited warranty on our work, the same warranty that you had when the unit was new! We will not only make the unit perform like new but we will restore the logic to as new cosmetic appearance as possible. The unit will be thoroughly cleaned, all worn parts replaced except the faceplate, all functions restored, faders cleaned and lubricated moisture shield added and all faceplate screws replaced with stainless steel (for silver units only). All of this for a cost of only \$169 plus S&H. There will be additional cost in the case of extreme physical damage but this is rare. Repair of the driver pack is \$65.00 per hour plus parts. It's rare to spend over \$200.00 on a pack unless it has been on fire. If your pack is gray with a pull-out disconnect on the front it may need immediate service. Go to the service section at www.audiolite.com for more information or just give us a call at 800-255-1015.
